

## Cancer QPIs Monitoring Process

The following process for monitoring, evaluating and benchmarking of cancer QPI data is proposed:-

### 1. Local Reporting

The local reporting schedule has been revised to ensure timelier reporting of QPIs. All QPIs are reported quarterly or six monthly.

StrategicLeads\_LocalReporting\_FINAL.xls

### 2. Case Review

Local reports are generated as per the reporting schedule and shared with tumour leads. Individual cases not meeting QPIs are reviewed by the tumour lead and cancer audit coordinator.

### 3. Monitoring

Details of case reviews are reported at monthly Cancer Management Team meeting

- QPIs reported during previous month
- Number of QPIs met, number of QPIs not met
- Findings from case reviews
- Actions taken / comments

In addition, QPI data is presented at the Cancer Strategic Leads monthly meeting. Each month QPI results from the latest annual regional or national reports, comparison with other Boards, as well as previous reporting periods are presented along with data from the latest local reports for 1 tumour group. The data presented celebrates achievements as well as highlighting challenges.

To date data has facilitated discussion around endometrial and cervical cancer, urological cancers and head and neck (scheduled for 10/06) cancers services.

Due to COVID-19 the scheduled meetings to discuss Upper GI, HPB and Lung cancers have been rescheduled.

A Cancer QPI Monitoring database has been developed to facilitate monitoring of QPI results over time.

### 4. Benchmarking

The Cancer QPI monitoring database along with presentations at the Strategic Leads meeting facilitates reporting and benchmarking of published annual data against other WoS Boards. QPIs not met are easily identified, Outliers or below WoS average scores are recorded along with actions taken.

### 5. Evidence of Improvement

Evidence of improvement can also be reported through the Cancer QPI monitoring database.

To date the following Crystal reports have been developed

- Tumour specific QPI cumulative results
- QPIs not met and actions/comments
- Outliers or below WoS average QPIs and evidence of improvement

Further reports will be developed on request
