SUBJECT: South Lanarkshire HSCP Performance Monitoring & Access Report

To advise the Board o	f performance relating to the	six MSG targets and AF	IP waiting times
For approval	For endorsement	☐ To note	
2. ROUTE TO TH	HE COMMITTEE		
This paper has been:			
Prepared	Reviewed	☐ Endorsed	

By South Lanarkshire H&SCP senior management team.

3. SUMMARY OF KEY ISSUES

3.1 Background

As highlighted in Figure 1 of the Appendix, published delayed discharge performance for the period to September 2022 continues to show performance cumulatively having been below target, albeit there has been some improvement in September such that performance is now better than trajectory for the month.

Figure 2 shows how that improvement in performance has continued to reduce the rate of delayed discharges and as at 18 November, South Lanarkshire was performing ahead of the national average.

There continues to be above average levels of absence across the care at home sector; infection, prevention and control closures in care homes to protect staff and patients therein and ongoing staffing difficulties across the wider health and social care sector.

Recently reported work associated with 'Discharge without Delay' and associated developments to support earlier discharge and potential admission avoidance are anticipated to assist in bringing further improvements in this position. Recently produced data, Figure 3 in the Appendix shows that between May and September, 94% of all patients from South Lanarkshire were discharged without delay.

Similarly, Figures 4 and 5 are showing the increasing number of patients where a Planned Date of Discharge (PDD) has been established and, in turn, the reduction in unplanned referrals for support for discharge.

A notable element of the Discharge without Delay programme is the application of the Home First approach. Part of the implementation of this approach by the SL HSCP has involved the establishment and ongoing extension of its local Home First programme. This programme is already receiving national recognition, including winning the Integrated Care Award at the 2022 Scottish Health Awards.

Work is ongoing in the recovery of AHP waiting times. AHP services have similar recruitment difficulties in being able to recruit to all posts associated with the additional number of posts advertised nationwide in seeking to recover services to pre-covid levels.

The joint HSCP waiting times and capacity planning group is co-ordinating a consistent approach to recovery and remobilisation across Lanarkshire.

Recovery will be influenced by the ability of services to fill posts as well as any further waves of Covid 19 infections. Full details are provided in the attached appendix.

STRATEGIC CONTEXT 4.

This paper links to the following:

Corporate objectives	ADP	\boxtimes	Government policy	
Government directive	Statutory		AHF/local policy	
	requirement			
Urgent operational issue	Other			

5. **CONTRIBUTION TO QUALITY**

This paper aligns to the following elements of safety and quality improvement:

i nree Quain	y Ambitions:
Safe	

Safe		Effective		Person Centred		
Six Quality Ou	tcomos:					
		life and is able	ta liva langar h	calthiar livear		
,	the best start in	life and is able	to live longer n	ealmer lives;		
(Effective)						
People are able to live well at home or in the community; (Person Centred)						
Everyone has a positive experience of healthcare; (Person Centred)						
Staff feel supported and engaged; (Effective)						
Healthcare is safe for every person, every time; (Safe)						
Best use is made of available resources. (Effective)						

6. **MEASURES FOR IMPROVEMENT**

Trajectories prepared for all respective services.

7. FINANCIAL IMPLICATIONS

Staff have been recruited against agreed mobilisation plans. As non-recurring funding runs out, then so the respective staff will be absorbed into mainstream budgets.

8. RISK ASSESSMENT/MANAGEMENT IMPLICATIONS

There are significant waits for access to AHP and other services with the attendant distress to patients and the system impact of slowing down 'flow'. Further detail is provided in the appendix.

FIT WITH BEST VALUE CRITERIA 9.

This paper aligns to the following best value criteria:

- the paper angle to the continuity boot railed of the continuity						
Vision and		Effective partnerships		Governance and		
leadership				accountability		
Use of resources		Performance	\boxtimes	Equality		
		management				
Sustainability						

10. EQUALITY AND DIVERSITY / FAIRER SCOTLAND DUTY IMPACT ASSESSMENT

None.

11. CONSULTATION AND ENGAGEMENT

None.

12. ACTIONS FOR THE COMMITTEE

Approve	Endorse	Identify further actions	
Note	Accept the risk identified	Ask for a further report	

13. FURTHER INFORMATION

SL HSCP Access Report October 2022

1. Delayed Discharge Performance

April 22 - September 22

April – September 22 there were 1,913 standard delayed discharge bed days more than trajectory (fig.1).

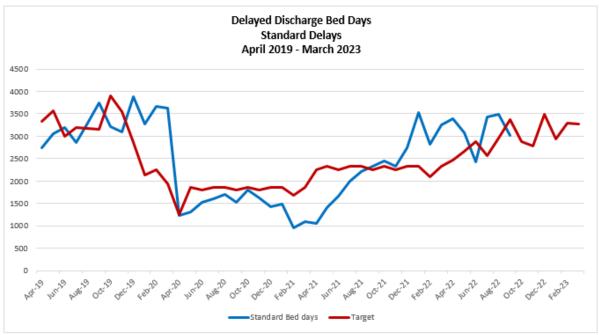

Figure 1 Delayed Discharge Performance (Standard Delays)

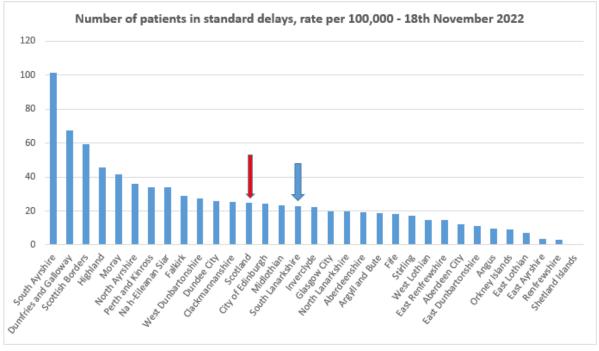

Figure 2 Patients in standard delay, rate per 100,000 for all HSCPs

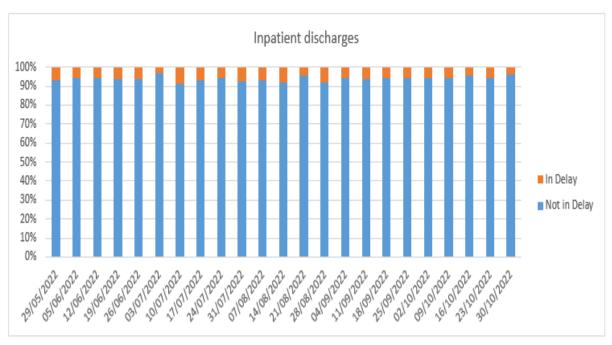

Figure 3 All inpatient discharges

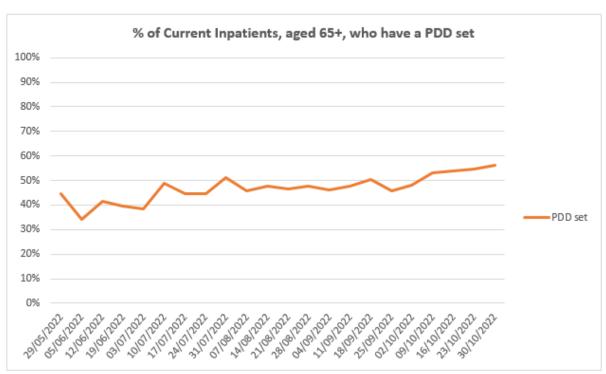

Figure 4 Current Inpatients (at time of census) with a Planned Date of Discharge

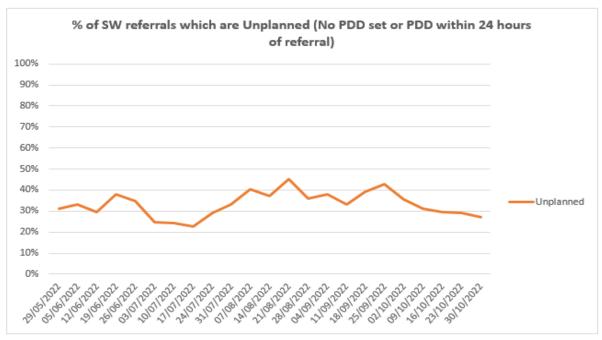

Figure 5 Current Inpatients (at time of census) with a SW referral that is unplanned

Factors affecting performance include:

Care Homes

- Regular Care Home closures as a result of outbreaks
- Significant recruitment and retention issues
- Lack of availability within Care Homes
 - Increased placement rate
 - Provider performance and sustainability (CI grades and moratoriums)
 - Interim beds consume LT capacity

Care at Home

- Significant recruitment and retention issues across social care in the context of record low unemployment rates and wage inflation in competitive market impacting significantly on capacity within Care at Home. New posts have been created to add capacity and persistent and varied recruitment campaigns ongoing. EK a recruitment challenge.
- Continued above average absence levels across internal and external providers with regular spikes caused by Covid; contributory impact of long covid and extended NHS waiting times are resulting in staff having prolonged periods of absence waiting medical/surgical intervention.
- A reduction in hours available from external providers
- Requests for packages considerably higher than average from acute settings
- Late and frequent changes to PDD (discharge dates) by consultants/MDTs
- Increased demand and unmet need from community services

The Scottish Government 'Discharge without Delay' approach was launched in October 2021. The aim of the approach is to improve pathways through hospital settings, reduce lengths of stay, reduce delays and build bed capacity. The aim is to ensure patients are treated in their home where appropriate. NHSL is one of four pathfinder sites, with representatives from NHSL, SL HSCP and NL HSCP involved in the development and testing of the associated measurement plan.

2. AHP Waiting Times - SL HSCP Hosted

The waiting times data contained in this section of the report is provided by NHSL Information Services and is unvalidated/ unpublished. This report is for the performance period to October 2022.

The Capacity Planning and Waiting Times (CPWT) group has been re-established, with the aim of supporting the full recovery of AHP services.

Historically the group has limited focus to specialties with a national profile which are outlined below. CPWT is working towards including all AHP specialties in future reporting.

Senior staff members in each of the individual AHP services triage all patients attending. (Triage is a method of determining the clinical priority of patient treatments based on the severity of their condition).

Given uncertainties relating to demand, capacity and service activity SL have agreed a recovery target of 50% for AHP services in 2022/23. Performance for waits for all services hosted by SL HSCP is detailed in Figure 6 and shows one of the OT services – Rheumatology, is not achieving the 50% target whilst another, Children and Young People has just met the target. It will be noted that both of these areas are starting to see a reversal of the downward trend in performance and seeking to move towards recovery.

	% Waiting Within 12 Weeks (recovery	Waiting Over	Longest Wait	
Service	target 50%)	12 Weeks	(Weeks)	Comment based on Statistical Process Control chart
Orwoo	target 6670)	12 Trooks	(Trocks)	Performance continues to show an upwards trend and
Physiotherapy MSK	81.00%	1153	27	consistently outperforms the recovery target.
				Current Performance is expected to range from between
				90% to 100% and therefore achieving the 95% standard is
Occupational Therapy MSK	100.00%	0	6	expected.
				Performance over recent months shows a downward trend
				with recent outlier points below the lower control limit,
				performance in October shows improvement. Please see
Occupational Therapy CYP	51.90%	262	32	detailed comment in section 2.1.
				Current Performance is expected to range from between
				78%to 100% and therefore achieving the 95% standard is
				expected. Sept and Oct 22 shows outliers in performance
Occupational Therapy Neurology	72.70%	15	25	below the lower control limit.
				This process has not been re-baselined post Covid recovery
				as there have not been enough data points consistently in a
				reasonable range. The process looks to be heading into a
				downwards trend. Please see detailed comment in section
Occupational Therapy Rheumatology	45.30%	146	31	2.2.
				Performance over recent months shows consistent
				achievement of the 95% target. Performance has dipped in
				September and October but remains within the control
Community Claudication	87.10%	36	30	limits.

Figure 6 Percentage waits within 12 weeks

2.1 Occupational Therapy – Children and Young People

Performance over recent months shows a downward trend (see fig 7 below) with recent outlier points below the lower control limit, performance in October shows improvement, 51.9%, with 262 people waiting beyond target.

- Increase in demand has seen sustained referral rate increase of 23% on prepandemic levels.
- Increase in complexity and variety of clinical presentations resulting in limited ability to utilise universal and targeted service offerings that have previously been successful in managing numbers.
- Despite the development of Neurodevelopment (ND) and CAMHS OT posts, treatment and ongoing support for complex ND cases and wellbeing presentations remain with CYP OT. This also means significant challenges for staff to try to transfer duty of care to more specialist services. No additional funding made available to CYP OT to manage these cases.
- Continued staff shortages as a result of vacancies, turnover and maternity leave.

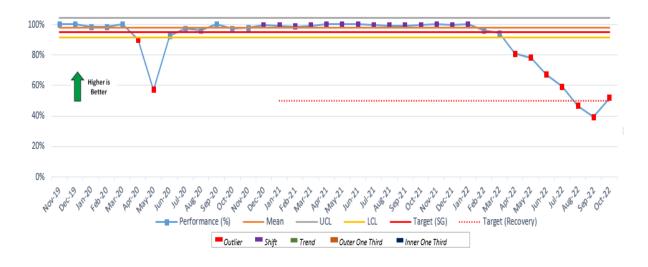

Figure 7 OT CYP Performance Nov 19 - Oct 22

2.2 Occupational Therapy – Rheumatology

Figure 10 below shows this process is statistically not in control and looked to be heading into a downwards trend, however in October, 45% there has been an improvement with 146 people waiting.

- The service has not been fully staffed since inception and there have been a number staff on long term absence.
- Increase in number of consultant referrals due to an improved awareness of what the service can offer
- Work is ongoing to identify maximum skill mix and referral management in an attempt to support the increase in referrals.

OT Rheumatology - % waiting within 12 weeks

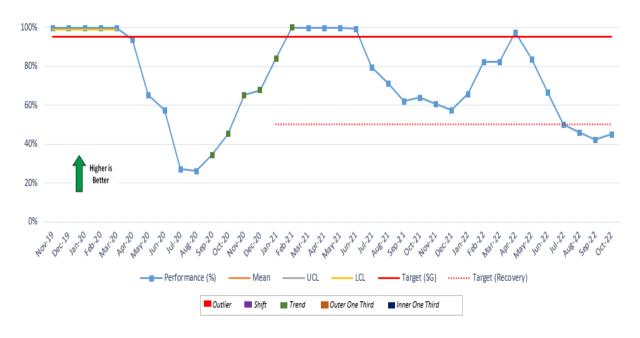

Figure 10 OT Rheumatology performance Nov 19 to Oct 22

3 Remobilisation and Recovery

Services are revising performance trajectories associated with RMP4 proposals and increased awareness of activity demand and staffing recruitment difficulties:

- Many services are experiencing difficulties recruiting staff.
- Performance data for some services is difficult to obtain pre-Covid while other specialties have manual data collection processes.
- Information Management are currently refreshing the existing performance report for AHP services to provide greater clarity regarding performance. This will support services currently on Trakcare.
