

Consultation on the Replacement or Refurbishment of University Hospital Monklands

Tell us what you think during the public consultation

16 July to 15 October 2018

An Easy Read Booklet

Introduction

Why do we need a new or refurbished hospital?

The current building is 40 years old.

It has problems with: asbestos, fire safety regulations, floods, break downs.

What are the options?

Option A: Do the Minimum

- On-going disruption from maintenance work

Option B: Fully refurbish the hospital

- Noise, dust and difficult to park during the work
- About 23 years to complete

Option C: Build a new hospital on the current site

- Noise, dust and difficult to park during the work
- About 13 years to complete

Option D: Build a new hospital on a different site

- More space to provide services in the best way possible
- About 8 years to complete
- Build either at Gartcosh or Glenmavis

Scoring the options

An event was held with members of the public and staff to score the options.

Option D of building a new hospital on a different site scored highest as it could best deliver improved services for patients.

Gartcosh scored higher than Glenmavis because it has better road links and a train station

Option costs

- Option A, Do minimum: **£326million.**
- Option B, Full refurbish: **£851million.**
- Option C, New build Monklands: **£613million.**
- Option D1, New build Gartcosh: **£562million.**
- Option D2, New build Glenmavis: **£567million.**
