

NHS LANARKSHIRE

PHARMACEUTICAL CARE SERVICES

PLAN

1st April 2011

Purpose

This Pharmaceutical Care Services Plan describes current provision of community pharmacy services within NHS Lanarkshire at 1st April 2011. It is expected that this document shall evolve over time as our expectations and vision for pharmaceutical services change and develop in years to come.

Information is presented for NHS Lanarkshire as a whole and subdivided into 12 major towns/ areas within the Health Board.

The prime purpose of this document is to summarise current service provision so that potential applicants for a new community pharmacy contract may consider the needs of the Board when considering their application.

The plan will also be referred to by the Board's Pharmacy Practices Committee hearings.

Background to NHS Lanarkshire

Lanarkshire is predominantly urban but with a significant rural component towards the south of the county.

It has a population of approximately 560,000 and contracted primary care services are delivered through

- 99 General Medical Practices
- 81 General Dental Practices (excluding 5 who provide orthodontic services only)
- 95 Optometric Practices
- 121 Community Pharmacies

which are widespread throughout the Health Board area.

An analysis of the health care needs and priorities of NHS Lanarkshire residents can be found via the website below which links to the most recent report of the Director of Public Health:

<http://www.nhslanarkshire.org.uk/Services/PublicHealth/directors-annual-report-2009-10/Pages/Introduction.aspx>

Community Pharmacy Services

Pharmaceutical care is currently provided across Lanarkshire through a network of 121 community pharmacies included in the Board's Pharmaceutical List. Presently there is one pharmacy included in the Board's Provisional Pharmaceutical List until 25th September 2011 (subject to any application for an extension of this date up to a period of nine months).

Seventeen factors which are important for characterising community pharmacy services and how they address the needs of the local population are shown below. Local guidance and support materials for delivering these services are available on:

http://www.communitypharmacy.scot.nhs.uk/nhs_boards/lanarkshire.html

1. Location.

Accessibility to community pharmacies by the general public is a major consideration.

ADEQUACY COMMENT

Given the diverse nature of Lanarkshire's geography we have not, at this time, set standards for either distance from or travel time to a community pharmacy. We believe that the travel time to a pharmacy within each of the localities should be appropriate for the rurality of that locality. This issue is considered on an individual basis at PPC hearings and takes factors such as public transport availability and the particular needs of vulnerable members of the community such as frail elderly and mothers with babies into account.

2. Disability Discrimination Act

All pharmacies have been given guidance about the Disabilities Discrimination Act and their requirement to take reasonable actions to make their pharmacies accessible for all.

ADEQUACY COMMENT

118 pharmacies in NHS Lanarkshire self report as being accessible. It is important that within a community patients with disabilities can easily access at least one pharmacy. Our records indicate that this is achieved with the sole exception being the village of Glenboig. Whilst this village is the only area where this aspiration is not automatically met from a readily accessible pharmacy, the pharmacy staff will respond to request for help in accessing the service from any patient who has difficulty.

3. Opening Hours

The National Health Service (Pharmaceutical Services) (Scotland) Regulations 2009, as amended, requires NHS Boards to produce a scheme of model opening hours. The model opening hours for Lanarkshire are Monday to Friday 9.00am to 6.00pm, Saturday 9.00am to 5.00pm with the ability to have one week day early closure of 9.00am to 1.00pm. Each pharmacy is allowed an hour to close at lunch time.

ADEQUACY COMMENT

A high proportion of pharmacies within Lanarkshire open extended hours, one until 10.30pm at night and 16 are open 7days per annum. In addition, very few pharmacies close over the lunch time period.

Public holiday cover is arranged in consultation with the contractors, Area Pharmaceutical Committee and Out of Hours services to ensure that all needs are covered.

4. Dispensing of Prescriptions

The timeous and accurate dispensing of prescriptions remains the principal function of the of the NHS community pharmacy service. All 121 community pharmacies in NHS Lanarkshire provide this service and in 2009/10 over 11 million prescriptions were dispensed

ADEQUACY COMMENT

The Health Board has no evidence of patients having difficulty in accessing dispensing services

5. Minor Ailments Service

The Minor Ailments Service facilitates the NHS treatment of minor ailments by pharmacists working within their community pharmacies. This service is available to patients exempt from the standard categories of prescription charges and provides:

- Free of charge treatment
- Patient choice,
- Ready no-appointment required access and

It also transfers some demand from GP and out of Hours services.

Over 97 000 patients are registered with community pharmacies within NHS Lanarkshire for this service and 15 000 prescriptions are written each month. Every community pharmacy in NHS Lanarkshire provides this service.

ADEQUACY COMMENT

The Health Board has no evidence of patients having difficulty in accessing the Minor Ailments Service

6. Urgent Supply of Medication when a GP is not contactable

Especially in the out of hours period and on public holiday weekends, NHS 24 can receive a high number of calls related to the resupply of medicines. A patient group direction which authorises community pharmacist to use their professional judgment in making a supply of medicines in response to an urgent need has proven to be very successful. All community pharmacies in NHS Lanarkshire provide this service.

ADEQUACY COMMENT

The Health Board has no evidence of patients having difficulty in accessing the urgent supply of medicines service

7. Display of Nationally agreed Public Health messages

All community pharmacies in NHS Lanarkshire participate in the core service of displaying posters with nationally agreed public health messages. The messages are coordinated nationally and pharmacies are required to display 4 posters per year for 6 weeks at a time. Recent topics include:

- Influenza immunization
- Minimising adverse drug reactions
- Pregnancy care
- Unscheduled care

ADEQUACY COMMENT

This service is consistently provided to national standards

8. Smoking Cessation Service

In the period 1/4/08 – 31/3/11 all Health Boards had a smoking cessation HEAT target to support 8% of their smoking population to successfully quit at 4 weeks. For NHS Lanarkshire this equated to 10737 successful quits. This target number was met in March 2011 – two thirds of successful quits were achieved from patients attending the NHS Lanarkshire Stop Smoking Service and the remainder was met by the community pharmacy service.

The HEAT target for 1/4/2011 – 31/3/2014 is to support 7.5% of the Boards smoking population successfully quit 4 weeks from their quit date through specialist services with 60% of the quits coming from the 40% most deprived within Board SIMD areas. For NHS Lanarkshire this equates to 9882 successful quits of which 5929 need to be within the most deprived areas.

ADEQUACY COMMENT

All but one community pharmacy participates in this service though two others in the immediate surrounds do so

Community pharmacy contributions to HEAT target achievement in 2008-11 illustrate provision of an adequate service.

9. PGD authorised supply of Emergency Contraception

119 community pharmacies participate in this service and cumulatively in 2009/10 almost 9 000 supplies of Emergency contraception were made

ADEQUACY COMMENT

All but two community pharmacies participates in this service though several others in the immediate surrounds do so.

11. Supply of Chlamydia test kits and treatment of Chlamydia

All pharmacies also participate in the supply of Chlamydia test kits. A PGD is also in place to authorise treatment of Chlamydia by community pharmacists though the supplies made via this service have been small approx 35 in 2010/11. Consequently there will be a review of this service in 2011/12.

11. Chronic Medication Service

This will be a particularly important service for helping patients ensure that their long term medication is used safely and effectively.

ADEQUACY COMMENT

The service began in earnest in 2010/11 but is still maturing. On 31st Jan 2011 115 community pharmacists in NHS Lanarkshire had registered 3371 patients for CMS.

At this stage there is no evidence that patient demand is outstripping service availability.

12. Assessment of patient's compliance needs and dispensing in Monitored Dose systems

As more vulnerable patients are cared for in the community, often with the support of family carers or Council employed home support workers, there is a need to assess whether or not patients can use medicines presented in conventional bottles or blister packs. Community pharmacists can assess patients for the suitability of a range of medicine presentations and supply the one which best meets the patient's requirement e.g. a monitored dose system. In providing this service pharmacists are expected to consider the guidance provided by NHS Lanarkshire with regard to the assessment process and provision of monitored dose systems.

118 pharmacies in NHS Lanarkshire provide this service. Annually approximately 4, 800 patients receive specialised weekly dispensing.

ADEQUACY COMMENT

This is a service which can be under pressure from time to time. We have recently reissued guidance on the assessment of patients for this service to minimise the risk of inappropriate demand and supply.

13. Services for Patients with substance misuse addictions

In NHS Lanarkshire over 5, 000 patients have an drug addiction problem and over 2,000 are receiving substitution therapy in the form of methadone or buprenorphine. Many patients require regular and frequent dispensing of their medication (often daily) and supervision of the consumption of that medication within the pharmacy. It is therefore a major service.

108 pharmacies in NHS Lanarkshire provide this service and between them supervise the consumption of over 250 000 doses of methadone and approx 28 000 doses of buprenorphine each year.

In recognition that drug injecting behaviour remains widespread it is important that good harm reduction strategies are developed. Recently the concept of Needle Syringe Exchange has been enhanced to a fuller "Injection Equipment Provider" (IEP) service. In NHS Lanarkshire 18 community pharmacies geographically spread to facilitate as wide access as possible provide an IEP service and approximately 18 000 transactions are carried out each year.

ADEQUACY COMMENT

There is close working between NHS Lanarkshire addictions services and community pharmacists to make sure that the community pharmacy services can meet the demands of the service

14. Oxygen Services

The provision of a community based oxygen service is essential for patients and local access via a community pharmacy is of great benefit to patients. It is however a specialist service and not all pharmacies have the experience or indeed the space to provide this service. Within NHS Lanarkshire 47 pharmacists provide this service.

ADEQUACY COMMENT

The widespread locations of the pharmacies providing domiciliary oxygen coupled with the fact that pharmacists transport oxygen to the patients homes ensures that all patient need is met.

15. Palliative Care Safety Net Pharmacy Provision

In palliative care it is sometimes necessary to change a patient's medicine and use relatively unusual medicines. Because the medicines can be unusual it is not reasonable to expect every pharmacy to have them immediately in stock. Yet, patients and family would reasonably expect the health service to rapidly respond to their needs. The concept of the palliative care safety net pharmacies is that 18 pharmacies, geographically spread throughout NHS Lanarkshire, each stock an agreed quantity and range of unusual medicines so that a patient/family can be assured that the pharmacy can rapidly respond to a changing prescription.

ADEQUACY COMMENT

There is regular feedback about this service and 3 pharmacies in relatively rural locations were added to the list of providers in 2010/11. This expanded network is fully expected to meet all patient need.

16. Stoma Care

The provision of stoma services is optional but all community pharmacies in NHS Lanarkshire provide this service

ADEQUACY COMMENT

All pharmacies provide this service to national standards

17. Consultation Rooms/Private Advice Areas

With community pharmacy developing a greater clinical role the need for a consultation room is increasing.

ADEQUACY COMMENT

117 community pharmacies in NHS Lanarkshire have at least 1 consultation room within the pharmacy and those which do not have a private advice area.

Conclusion

This pharmaceutical care services plan describes many factors which are important in assessing the adequacy or otherwise of community pharmacy provision within a particular neighbourhood.

These factors, coupled with the appendices which illustrate provision within NHS Lanarkshire as a whole and within specific localities will be of value to potential applicants for a new pharmaceutical contract.

NHS Lanarkshire looks forward to developing its Pharmaceutical Care Services Plan in line with Regulations and advice from SGHD in the expectation that this will facilitate the ongoing rational provision of pharmaceutical services in response to evolving services and the needs of our local populations.
