Annual Report document

The Annual Report of the Director of Public Health is available in a separate document at the following link:

www.nhslanarkshire.org.uk/publications/Documents/Public-Health-Report-2016-17.pdf

General notes:

- Lanarkshire has two Health and Social Care Partnerships (HSCPs) – North Lanarkshire and South Lanarkshire. The HSCPs cover the same geographical areas as North Lanarkshire Council and South Lanarkshire Council. There are ten localities within the HSCPs – six in North Lanarkshire (*Airdrie, Coatbridge, North, Bellshill, Motherwell and Wishaw*) and four in South Lanarkshire (*Cambuslang/Rutherglen, East Kilbride, Clydesdale and Hamilton*) – **see map on page iv**. On 1 April 2014, changes to NHS board boundaries resulted in NHS Lanarkshire becoming coterminous with the HSCPs and local authorities. The tables in the Statistical Appendix indicate whether information relates to the old or new NHS Lanarkshire boundary, the exception being where all data relate to April 2014 onwards.
- Populations shown and used in rates calculations are, for NHS Lanarkshire, the HSCPs and Scotland, mid-year estimates produced by National Records of Scotland (NRS). Locality populations are from NRS small area population estimates at data zone level.

1 The 15% most deprived data zones in Scotland are from the Scottish Index of Multiple Deprivation (SIMD) 2016.

2 Populations are mid-2016 small area population estimates (SAPE) from NRS.

3 Scotland housing tenure figures are for 2016.

4 Data source has changed from previous years. The claimant count represents those claiming Job Seekers Allowance and Universal Credit (UC) who are required to work. For the period covered by these figures, UC was limited to claims which are relatively simple. Under UC, more people are identified as unemployed and required to look for work including some who previously claimed Child Tax Credit or Housing Benefit and also generally partners of claimants.

5 Numbers of claimants as a percentage of the population aged 16-64.

Life expectancy at birth - males²

Life expectancy at birth - females²

1 Expectation of life is the average number of years left to a person of an exact age who is subject to the current mortality probabilities from birth.

2 Historical estimates for NHS Lanarkshire are currently not directly comparable to 2013-2015 estimates due to a difference in method of calculation.

1 Cancer registration is a dynamic process. The figures presented here may therefore differ from previously published information.

2 Data relate to the new NHSL boundary.

3 All cancer sites, not just lung, female breast and large bowel. Non-melanoma skin cancer registrations are included.

Notifiable diseases – summary of notified cases^{1,2,3}

by year of onset: 2014-2016

Given the severity of these diseases, there is a legal requirement for clinicians to notify confirmed and suspected cases urgently, albeit some cases are subsequently shown not to have had that illness.
